

Medi-C Plus®

Natural Heart Health Solutions

WITH JILL KALMACOFF

- Helps support/maintain cardiovascular health
- Helps collagen formation
- Helps maintain bones, teeth and gums
- Helps reduce the recurrence of cold sores

Inadequate amounts of Vitamin C means poor collagen. Vitamin C and Lysine work together to build collagen, which strengthens and holds together the coronary cells. Coronary arteries, closest to the heart, receive the greatest pressure. Without enough Vitamin C the collagen weakens. This sets the stage for heart attack or stroke.

Healthy collagen also supports healthy teeth, gums, cartilage, bones, connective tissue and wound healing. The antioxidants in **Medi-C Plus®** also support and help maintain good health.

WHEN

Saturday, May 27, 2017

1:30 pm – 2:30 pm

WHERE

Good Health Naturally
(Cherryhill Village Mall)
301 Oxford Street West, London, ON

RSVP
